

Future Learn courses – Introduction

All students in year 12 are required to complete an enrichment programme. One of the activities is completing an on-line course. There are 1000's of on-line courses that can be completed in just a few hours and for which we can give students credits towards their enrichment programme.

We would like all perspective year 12 students to complete an on-line course prior to starting in the Sixth Form. To do this you need to visit the future learn website:

<https://www.futurelearn.com/>

You need to register on the site and select the course that you want to study – it may be sensible to select one related to the courses you want to take at Sixth Form or related to a career that you are interested in. As well as getting enrichment credits in school students can add this to their CV or application for university next year.

Please note: the courses are all free to do, there is an option to pay for certification but there is no need to do this as we will credit students with enrichment points and keep records for future references.

Once you have completed a course please fill in the on-line course record form and bring it in once you start Sixth Form.
