

Resource Provision

(presently being updated 19.01.21)

The Resource Provision Unit at Blackfen School for Girls is for students with Statements and/or Education Health Care Plans for;

1. Visual impairment (VI)
2. Speech, Language and Communication needs (SLCN) and working below NC3 on entry in year 7.

Our Resource Provision was reviewed positively by OFSTED, in March 2016:

“The two specialist resource centres within the school cater sensitively for those who are vulnerable, or pupils who have special educational needs or disability. Pupils in the Jigsaw resource were observed developing their communication skills and deepening their understanding of literacy. In talking with an inspector, one pupil explained how she used specialised equipment to help her read. Pupils in Jigsaw talked enthusiastically about their learning and the work they were also doing in the main school. Pupils make similar progress in comparison to their peers. In the Phoenix centre, pupils work with interest and focus. Empowering displays and motivational slogans promote a purposeful and calm learning atmosphere. Therefore, with highly effective teacher support pupils progress favourably and without conflict”.

Students with SLCN are taught in our JIGSAW classrooms where they receive highly differentiated specialist teaching in English, Maths and Humanities. Lessons also focus on literacy development using a multisensory, structured programme of 1-1 reading comprehension, spelling, Word Shark and touch typing.

Students who cannot access the full curriculum because of educational or emotional issues can access the PHOENIX centre.

Each term, a Celebration Afternoon is held, where students present an aspect of their work or learning that they are proud of. Governors, parent and members of the senior Leadership team are invited and our guest book (made by a current student) is signed; the afternoon is hosted by our students who oversee details of the afternoon including refreshments.

The resource provision has a base room, equipped with a range of DAISY and CD players and specialised equipment for practical subjects, such as Science, Food Technology, PE and Geography. Written materials can be provided in each student's required format – large print, DAISY audio, Braille (Grade 1 or 2) or Moon. Staff have experience of producing 3D models with enlarged or Braille labels, as well as tactile diagrams, using heat fuser (Zychem) paper. Texts can be adapted quickly, using Textbridge and Duxbury software, and embossed on an Index Everest V4 embosser. The resource maintains a large stock of textbooks in electronic format, and a broad range of DAISY and MP3 audio titles are available.

Teachers and support staff are provided with VI awareness, curriculum adaptation and sighted guide training, and understanding is fostered among other students through assemblies and awareness training.

All students within JIGSAW are monitored closely and complete half termly assessments to evidence progress. Once a student has attained a secure level 3, they are supported in transitioning to mainstream

lessons. For some students this occurs during year 7. For others it is not appropriate and they continue their lessons in JIGSAW. This overlapping support allows students to make considerable progress.

Close collaboration with speech and language therapists (SLT) and specialist teachers from the Bexley Joint Communication Team enables regular support for students. Developing social communication skills for students with VI is an area of focus, and the SLT visits every week. Bexley's qualified teachers for hearing impairment (QTHI) support students who also have HI. Staff have experience in supporting students with hearing aids, including the use of radio aids, and the Jigsaw classroom is equipped with a Soundfield system, to maximise hearing.
